7. Write a project description that will serve as a stand-alone summary of the project for legislative review. The description should summarize the entire project's intended purpose, the purpose of the funds requested (if request is a sub-part of the entire project), and most importantly the detail on how the funds requested will be spent - for example how much will be spent on positions and associated salaries, specifics on capital costs, and detail of operational expenses. The summary must list what local, regional or statewide interests or areas are served. It should also document the need for the funds, the community support and expected results when applicable. Be sure to include the type and amount of services as well as the number of the specific target population that will be served (such as number of home health visits to X, # of elderly, # of school aged children to receive mentoring, # of violent crime victims to receive once a week counseling etc.)

This project will provide enhanced interior and perimeter security for the Plant City Police headquarters facility by creating appropriate stand-offs and hardening the facility.

With the increased number of incidents involving attacks on police headquarters additional security measures such as enhanced gate accesses, strategically designed video camera network, and bullet resistant glass enclosures would help to minimize the inherent vulnerabilities of the current facility.

This project includes:

- ? Replacing existing chain link fencing in front of the facility with concrete and rod iron perimeter fencing supported by re-enforced bollards to impede motorized vehicles from impacting the facility's main structure.
- ? Creating pedestrian access points that are electronically controlled with lock-out capabilities. Access point would be continuously monitored through the video camera network.
- ? Establishing ingress and egress points for vehicular traffic that are electronically controlled with remote lock-out capabilities. Access points would be equipped with retractable barricades and continuously monitored through the video camera network.
- ? Installing a bullet resistant enclosure within the lobby to provide security for civilian personnel assigned to that public interface area. This would minimize the potential for harm should an individual enter the facility with a weapon. The main entrance would be equipped with a magnetometer to identify potential weapons.

8. Provide the total cost of the project for FY 2016-17 from all sources of funding:

Federal: 0

State: 0 (Excluding the requested Total Amount in #4d, Column G)

Local: 0

Other: 0

9. Is this a multi-year project requiring funding from the state for more than one year?

No
