6. Organization or Name of Entity Receiving Funds:

- a. Name: New College of Florida
- b. County (County where funds are to be expended) Sarasota
- c. Service Area (Counties being served by the service(s) provided with funding) Statewide

7. Write a project description that will serve as a stand-alone summary of the project for legislative review. The description should summarize the entire project's intended purpose, the purpose of the funds requested (if request is a sub-part of the entire project), and most importantly the detail on how the funds requested will be spent - for example how much will be spent on positions and associated salaries, specifics on capital costs, and detail of operational expenses. The summary must list what local, regional or statewide interests or areas are served. It should also document the need for the funds, the community support and expected results when applicable. Be sure to include the type and amount of services as well as the number of the specific target population that will be served (such as number of home health visits to X, # of elderly, # of school aged children to receive mentoring, # of violent crime victims to receive once a week counseling etc.)

The funding will be used to construct and equip a 22,000 square foot addition to the current Heiser Natural Science Building. This project is one of only 7 institution-specific requests included in the State University System's Fixed Capital Outlay LBR approved by the Florida Board of Governors at their meeting held on November 5, 2015. A final \$1,000,000 in nonrecurring fixed capital outlay construction funds will be requested in FY 2017-18 to allow the College to complete construction. In addition, an estimated \$346,000 in formula generated recurring Plant Operations & Maintenance (PO&M) to support this newly constructed space will also be requested in FY 2017-18. The actual amount will be determined once calculations are confirmed.

The additional laboratory space will allow us to increase retention and train more students in STEM fields, and we expect to increase the percentage of New College bachelor's degrees in STEM fields from 27% in 2015 to 41% in 2020. We expect to double externally funded faculty research with the new research laboratories.

The new facility will benefit New College student learning and research, faculty teaching and research, the companies that provide internships and jobs for the STEM students and graduates, and the State of Florida that will have a larger STEM workforce.

8. Provide the total cost of the project for FY 2016-17 from all sources of funding:

Federal: 0

State: 0 (Excluding the requested Total Amount in #4d, Column G)

Local: 0

Other: 0

9. Is this a multi-year project requiring funding from the state for more than one year?

Yes
