7. Write a project description that will serve as a stand-alone summary of the project for legislative review. The description should summarize the entire project's intended purpose, the purpose of the funds requested (if request is a sub-part of the entire project), and most importantly the detail on how the funds requested will be spent - for example how much will be spent on positions and associated salaries, specifics on capital costs, and detail of operational expenses. The summary must list what local, regional or statewide interests or areas are served. It should also document the need for the funds, the community support and expected results when applicable. Be sure to include the type and amount of services as well as the number of the specific target population that will be served (such as number of home health visits to X, # of elderly, # of school aged children to receive mentoring, # of violent crime victims to receive once a week counseling etc.)

This system upgrade is important to maintain collaborative effort between the State and the Suncoast Regional Communications System team, to ensure the SLERS connectivity is achieved. The funding, requested, will assist a regional effort to upgrade law enforcement radio systems in Manatee County. The new local system is designed to replace a badly outdated local system, which is no longer supported. Additionally, the current system cannot be maintained and this change is badly needed to protect citizens and first responders. Once upgraded to the P25 compliant standard, the new system will provide connectivity to the State Law Enforcement Radio System, also known as SLERS. The service population will be first responders, all residents and visitors to Manatee County; not excluding all vehicle passengers using the I-75 corridor.

This is anticipated to be a 100% non-recurring funding request. Manatee County does not anticipate requests for additional state funding in the future. That being said, it is anticipated that there will be some additional infrastructure costs to connect the systems depending on the SLERS project scope and implementation.

This \$2 million request is for a portion of capital costs associated with the acquisition and installation of a regional P25 800 Mhz land mobile public safety radio system to serve the citizens of Manatee and the neighboring county of Sarasota. This funding reduces the needed funding and associated debt service for the public safety project.

Manatee County's portion is \$15.5 million; the funds are being provided by Surtax III proceeds.

8. Provide the total cost of the project for FY 2016-17 from all sources of funding:

Federal: 0

State: 0 (Excluding the requested Total Amount in #4d, Column G)

Local: 15,500,000

Other: 0

9. Is this a multi-year project requiring funding from the state for more than one year?

No
